

Presentation of Davide Chimera, a PhD student from University of Pisa

Contact details: d.chime91@gmail.com

Brief presentation:

My name is Davide Chimera, I'm a PhD candidate in Clinical Physiopathology, Cardiopulmonary Curriculum, at the University of Pisa. I completed my Medical Degree and the Residency in Respiratory Medicine at the University of Pisa, gaining clinical and research experience in pulmonary diseases. I am currently working in the Respiratory Unit of the Pisa University Hospital. My research focuses on the evaluation of the impact of air pollutant exposure on the progression and mortality of patients affected by Idiopathic Pulmonary Fibrosis (IPF). As part of this study, we are establishing a collaborative network to develop a comprehensive and multicentre study. In addition to his PhD research, I have been actively involved in studying the long-term pulmonary effects of COVID-19 pneumonia and Interstitial Lung Diseases (ILD).
