

Presentation of Giada Cucciolini, a PhD student from University of Pisa

Contact details: giada.cucciolini@phd.unipi.it

Brief presentation:

My name is Giada Cucciolini and I am an anesthetist/intensivist currently working at the Neuroanesthesia and Resuscitation Department. I am specialized in point-of-care ultrasound on various parts of the body, particularly the brain and optic nerve. I am also very interested in various types of monitoring, especially multimodal monitoring, which is the simultaneous combination and integration of various signals from the same patient.

I previously worked in Cambridge for a year, where I studied signal processing.
