

Presentation of Marco Andrea Malanima, a PhD student from University of Pisa

Contact details: marco.malanima@phd.unipi.it

Brief presentation:

I am currently a first-year PhD in clinical physiopathology and third-year resident in Medical Statistics at the University of Pisa. Previously, I had graduated in Molecular Biotechnology from the same university. My research activity focuses on providing support or advice in clinical study design and data analysis. My PhD projects deals with developing a prognostic model for cardiovascular disease in woman which could possibly incorporate gender-specific risk factors.
